

Pinnacle Gas Treating, Inc.

a Subsidiary of Western Gas Resources, Inc.

02/26/98

To Whom it may Concern:

Aarvak Services of Houston, Texas have been utilized on the Pinnacle Gas Bethel facility construction for five months and have performed in an expert and professional manner. The capacity in which their services have been concentrated is as Instrument and Electrical design and construction. The facility is a 350 mmcf. amine sweetening process with Lo-Cat and Claus sulphur recovery units. Aarvak was brought in mid stream to assist Western Gas engineering and construction personnel complete the project. Their people inter faced with existing staff and contract personnel on site very well.

Aarvak Services assumed full responsibility of total Instrument and Electrical design, installation and inspection. They also supplied technical assistance for commissioning and start up, including three 100 mmcf. field dehydration units, and associated gathering system consisting of one hundred and fifty miles of pipeline, with fiber optic system. The level of expertise in this area greatly enhanced scheduled completion and start up dates. Ability and experience level of man power from Aarvak Services on this project is superior to other contractors I have worked in the past. Diligence and priority is placed on N.E.C. and operational requirements. Staff attitudes are outstanding, and management exudes confidence and team work.

Our working relationship with Aarvak Services on this project has been uncomplicated and easily managed. I would recommend Aarvak services as an Instrument and Electrical E.P.C contractor for any project they wish to under take.

Dear : Sirs

Propak Systems has been utilizing the services of Aarvak as an electrical consultant and electrical construction subcontractor for approximately 12 years for projects in Canada, The United States of America, Argentina, Bolivia, Ecuador, and Mexico. The projects have ranged from small compressor installations to 300 MMSCFD. gas processing facilities inclusive of projects requiring the installation of prime power generation facilities of up to 9 mw of electrical power.

The projects executed by Aarvak for Propak have been performed as both Firm Price Contracts and / or on a Force Account bases depending on the nature and location of the project. Regardless of the type of contract, Aarvak has performed the work in a diligent, expedient, economical and professional manner in all respects and in the best interest of Propak and Propak's Client.

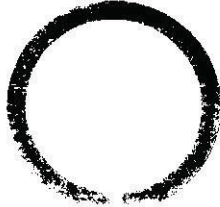

Propak is today continuing to utilize Aarvak for their North American and South American projects and would recommend this firm to other prospective clients and general contractors in the petroleum industry for electrical and control installations.

Yours truly,

Dwayne C. Grant
Project Manager

To whom it may concern:

RE: Aarvak Services Inc.

Gentlemen,

Aarvak Services Inc. was the successful bidder on the instrument and electrical construction portion of our Rockland Oil Project, located in Buffalo, Texas.

This was the first time our company had utilized Aarvak Services Inc. They were very professional in all areas of the project which they were associated.

The people they utilized were excellent craftsman. The management and supervision of the project was handled in a very professional manner.

I would recommend their company and I will continue to use their services in the future.

Sincerely,

Laverle E. Morrow

TO: WHOM IT MAY CONCERN
RE: AARVAK ELECTRIC LTD.
LLOYDMINSTER, ALBERTA

The ability of this organization to perform electrical and control work has been above average for the Lloydminster area. This organization has done both contract installations and forced account work. They are capable of meeting deadlines and could have beaten deadlines in many cases if owner supplied materials would have been available.

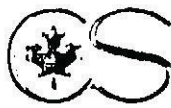

This firm has done work for Husky, Thermal Operations for approximately one and one-half years. Their work has been in the areas of heavy oil treating batteries, test facilities, injection facilities, and oil well pump jack electrification.

I would recommend this firm to be put on a bidder's list for petroleum related electrical and control installations.

Yours truly,

H.R. Holt,
Superintendent of Thermal
Construction & Engineering

Attention: Walter Manning

Dear Sirs:

Aarvak Electric Ltd. recently completed a contract for Canadian Superior Oil Ltd. involving the installation of electrical systems throughout our Liege Gas Compressor Station. This included a garage, control building, utility building, dehydrator building, residence and ESD system along with RTU wiring at each of our wellsites.

The work was carried out in a diligent, expedient and professional manner in all respects. We would like to thank Aarvak for their contribution to this project and to the people directly involved for their expertise and co-operation, which permitted successful completion of the project within a restricted time frame.

Canadian Superior Oil Ltd. would have no reservations in using Aarvak Electric Ltd. for future work or in recommending them for work of a similar scope to the above mentioned project.

Yours very truly
